This is the fourth office action for serial number 09/767,442, entitled Collapsible Display System, in response to Amendment B filed on August 8, 2003.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 15 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Allen 4,017,152. Allen a pair of mounting member (14), plurality of telescoping strut members (22), a central hub member (16), a banner (12).

Claims 28-41 are rejected under 35 U.S.C. 102(e) as being anticipated by Zeigler 4,522,008. Zeigler discloses a method providing a display unit having a external snap fit connector (140), a plurality of receptors for receiving a snap-fit connector (60, 110, 63') being fixed or hinged (figures 20-30), providing openings (slot before 154), snapping said snap-fit connector into one of the receptors (figure 5), the device is

Art Unit: 3632

capable of fixing to wall since the applicant has not positively claimed the wall it is only functionally recited.

Allowable Subject Matter

Claims 1-4 and 11 are allowed.

Claims 20-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed August 8, 2003 have been fully considered but they are not persuasive.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., telescoping support structure in regards to claims 15, 28, and 36) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

In response to the applicant's arguments regarding the mounting means the examiner would like to point out that Allen clearly teaches mounting members for mounting a banner. The corner brackets (mounting means 14) carry opposite ends of a banner and the plurality of strut members (22) for spacing said mounting members (14).

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., additional mounting means) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened

Art Unit: 3632

statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
